

INSTALLATION

1. Eyebolt Installation

The weight of PowerLED's Lowbay luminaire is approximately 8.0kg. It should be installed using steel cable or chain with a minimum \varnothing diameter over 3mm to suspend from the ceiling. Secure the 4 eyebolts supplied with the Lowbay fully with the nyloc nuts. (fig 1.)

2. AC Supply Connections

All connections should follow the national regulation of the country where the Lowbay is installed. A 2000mm H05RN-F black 3 core cable is fitted as standard. 1~10V Dimming cable connected only when dimming is required (180+ version only). Do not remove the dimming cable protection unless dimming is required.

- This product is intended to be installed by a qualified electrician, failure to wire the product correctly will invalidate any warranty and could present a risk to life.
- Make sure all electrical power is turned off while installing the fixture.
- This luminaire must be adequately grounded for protection against shock hazards and to ensure proper operation.
- Disconnect power before servicing.
- Suspend from adequate structure that can safely support the fixture.
- The light source of this luminaire is not replaceable; when the light source reaches its end of life the whole luminaire should be replaced.

WARNING:
