

Remotes already paired to controller can be deleted in "Setup" of App to restore to factory default. In some cases it's possible to forget which remote is programmed to, but can be restored to factory default by using the combo keys. Press and hold all three keys of the remote simultaneously for 10-15 seconds until the indicator flashes three times.

Restore to factory default

- 1) Press the remote key **Q** and **▲** simultaneously once and release (do not hold) and it will search for a receiver which can take up to 30 seconds.
- 2) Go to the Setup page and select Add new device, then search initial device and add it to target device group.

Pairing your new remote controller to the receiver.

Activate the remote controller before pairing with a receiver - each remote controller can be paired to any receiver.

1. Pair the remote to receiver

Note: Before the first use, please remove the protective film on the battery.
Battery: CR2032

BLE-RC BLE Mesh Wireless LED Remote controller instructions

Declaration of Conformity

We PowerLed (wholly owned subsidiary of Sunpower Group Holdings Ltd) of Orion House, Calleva Park, Aldermaston, Berkshire, RG7 8SN, UK declare under our responsibility that our product BLE-RC Bluetooth Smart Phone Controller is herewith confirmed to comply with the requirements set out in the UK legislation, Electromagnetic Compatibility Regulations 2016, and the European Council Directive on the Approximation of the Laws of the Member States relating to Electromagnetic Compatibility Directive (2014/30/EU).

Wednesday 28th April 2021.
